

# Ship Integrated Information System (SIIS)

Reliably, Fast, Secure and Uninterrupted  
Integrated Information System

[www.kocsavunma.com.tr](http://www.kocsavunma.com.tr)

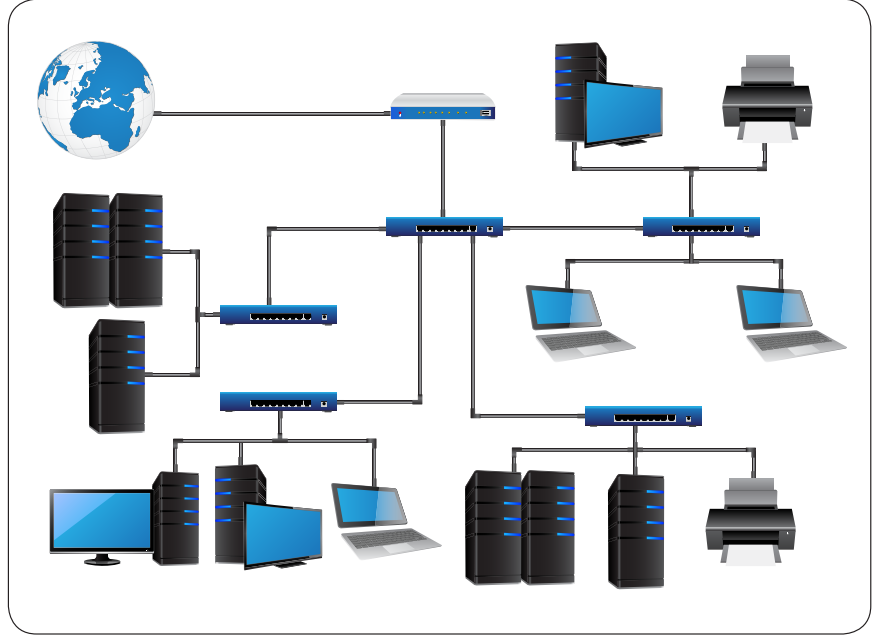

## Koç Bilgi ve Savunma Teknolojileri A.Ş. (KBS) provides SIIS solutions for New Generation of Ships

**SIIS** Solution, includes activities with the aim to provide custom solutions in conjunction with customer requirements as system analysis and design, system installation and integration, system test and experiences, operation/end user trainings, along with warranty and maintenance activities.

**SIIS** is designed to provide support for office and general operating personnel in work and living quarters while ship is on cruise and at shore.

**SIIS** is an integrated system that consists of Commercial Off-The-Shelf (COTS) units. Upon request, critical units to be determined are provided conforming to MIL-STD-810G standard.

**SIIS** is capable of supporting all physically separated hardware units of separated networks. Established ship local networks are provided with cable and inter-connection hardware, to connect with; available shore-ship, ship-ship network connection points and satellite communication infrastructures along with TSK-NET, NATO and Mission Networks.

**SIIS** generally consists of units below;

- Special Design Racks
- Active Network Device and Modules
- Shore Network Connection Hardware
- Network Accelerators
- Passive Network Hardware
- Network and Server Racks
- Uninterruptible Power Supply
- KVM Console with Control Unit
- User Computers
- Laser Printers and Scanners
- Network Security Devices
- Data Storage Units
- Backup Units
- Power Distribution Units
- Operating System Software
- Server Management Software
